PROJECTS

Blackjack Game   **March 2022 – August 2022**

- A card game which allows player and dealer to play at same time along with advanced options like single player and multi-player.
- Used python in Visual Studio Code and used the function, random functionality and basic if else statement of python.

Hangman Game   **December 2021 - March 2022**

- A word game where user gets to guess a random word of length represented by the blank spaces and gets hanged (looses) if they cannot guess the word in limited number of attempts.
- Used python and its random functionality to randomly generate a word and used basic if and else condition along with loops to create different scenarios.

EXPERIENCE AND LEADERSHIP

Tutoring   **March 2020 – December 2021**

- Provided guidance and tutoring to 48 high school computer Science students. Additional duties included keeping records and provided five office hours to work one-to-one sessions.
- Assigned and reviewed assignments; helped students with their coursework by developing the curriculum and syllabus; increased the academic performance of every student by 30% as per statistics by paradise record center (2018).

President of Paradise Student Organization   **August 2019 -February 2020**

- Hand selected by group of teachers to be president of Paradise Student Organization
- Managed website project which included organization, design and implementation. Coding language included: Python.
- Strategized and implemented recruitment for student organization. This included over 60+ interviews which resulted in a 45% increase of volunteers to the organization.
